ABOUT US

Lewis and Clark Traffic Control & Security LLC is a 100% veteran and minority-owned company with over 25 years of experience in law enforcement, private security, and traffic control. We are based in Western Washington and proudly serve all of Western Washington.

Our team consists of highly trained and experienced professionals, including retired police officers and military veterans. We provide a range of services, including security patrol, security guards (armed or unarmed), traffic control (UPO), surveillance, and drone services. We are a licensed and insured private security company and a prime federal contractor, holding a State of WA Private Security Company license and a SAM Cage Code.

OUR SERVICES

• Traffic Control (AKA UPO) Services

Lewis & Clark provides professional traffic control officer (UPOs) services for flagging companies, road construction companies, electrical or other cable companies, public works, or any company or government agency that is doing work in or within 100 feet of an intersection. Choose us because...Our UPOs are licensed by the State of WA.

- Our UPOs are all current or former law enforcement professionals.
- Our UPOs wear company uniforms with company patches, reflective vests, have traffic control light keys, lit orange or yellow flashlights, and employee badges. These clearly identify them as professional private traffic officers.
- Our UPOs are flagger certified.
- Our UPOs are OSHA Work Zone certified.
- Our UPOs are encouraged and compensated for obtaining First Aid/CPR/AED/NARCAN or other relevant certifications.
- Our UPO service can include a marked vehicle (company wrap w/flashing overheads).

• Security Guard Services

Lewis & Clark provides professional, uniformed, or casually dressed security guards (armed or unarmed) to homeowners, businesses, and government entities.

- Special events or public gatherings or any sort.
- Protection of small or large businesses and government office buildings.
- Protection of storage buildings and equipment storage yards.
- Forest Fire (gov.) federal contracting.)

• Drone Services

Lewis & Clark Drone Services are done on an individual basis, where all jobs are customized for you the customer. No boilerplate approach. We seek to tailor our projects, so we understand clearly what the customer expects in the scope of work before we begin. Under promise and over deliver is our motto. Our drone services include

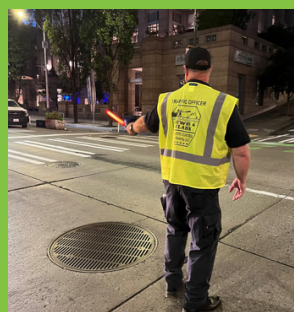

- Drone photography and cinematography for special events, weddings, celebrations, etc.
- Drone Real Estate Videos.
- Drone roof inspections.
- Drone search and rescue assistance.
- Drone assistance in security services.
- Other services may be available upon request.

Lewis & Clark's Drone Services Pilot is FAA Part 107 approved, insured, and follows local and federal drone regulations.

WHY CHOOSE US?

- **Lewis & Clark** is a 100% veteran and minority-owned company with over 25 years of law enforcement, private security, and traffic control (UPO) experience. (We are veteran, minority, and DBE certified).
- We provide professional traffic officers (UPOs) to clients who work in or near intersections, where more control is needed or required by demand, ordinance, or law, as compared to a flagger. We are primarily in Pierce and King Counties of Washington State but can extend our services beyond those boundaries. Our security guard (armed or unarmed), surveillance, and drone services operate independently or provide support to on-site security staff and are an effective deterrent to criminal activity.
- All of our officers are highly trained, part-time employees who are prior military, active police working part-time or retired. We provide our services to clients, who may be private citizens, private companies, (small and large), and public entities (local, state, and federal).
- Our company's modest, yet efficient management team uses modern technology to successfully monitor contracts and personnel to meet our client's expectations. Less overhead costs equate to savings for our clients.
